

## Information about computer technology at the Technological University of Tajikistan

The equipping of classrooms, laboratories and workplaces for employees with computer technologies, the creation and expansion of computer classes, the widespread introduction of ICT achievements in university management and improving the quality of education is one of the university's priority areas. For this purpose, the university annually allocates financial resources for the acquisition of various computer technologies. Computer equipment is also replenished through grants in the framework of TUT participation in the TEMPUS, ERASMUS +, and other international educational programs, as a result of cooperation with enterprises and institutions of the republic.

Table 1 and Figures 1 and 2 show the dynamics of changes in computer technology over the past 6 years.

Table 1. The number of computer equipment in TUT

Name	2014	2015	2016	2017	2018	2019
A computer	704	744	754	794	874	900
a printer	204	239	243	247	249	254
Projector	71	77	82	94	98	100
Electronic board	61	61	64	64	64	64
Scanner	38	40	41	43	44	48
Xerox	20	20	20	20	20	23
